Education

University of California, Berkeley Berkeley, California Graduated May 2022

- Relevant Coursework: Computational Structures in Data Science (CS88), Data Structures and Programming Methodology (CS61BL), Introduction to Software Engineering (CS169A)

Georgia Institute of Technology Atlanta, Georgia Expected Graduation: 2027

- Master of Science in Computer Science (OMSCS), specializing in Artificial Intelligence

Certifications & Clearances

- Clearances: US Secret Security Clearance
- Certifications: CompTIA Security+ (Plus) Certification, FreeCodeCamp Responsive Web Design

Work Experience

90meter Inc June 2023 - Present

Lead Software Engineer, 2025 - Present

- Lead, maintain, and develop Windows desktop application used on over 1.5 million desktops
- Manage team of 3 software engineers and interface with clients to deliver smart card solutions
- Designed and developed feature to remove certificate PIN prompts and increase user productivity
- Built CI/CD pipeline, minimizing human errors and decreasing time from development to test by 50%
- Technologies: C#, C++, .NET Framework 4.8, WinForms, Jenkins, Remote Procedure Calls

Software Engineer, 2023 - 2025

- Utilize .NET framework to develop a full-stack web application for smart card management
- Implemented audit report generator with over 100 built-in reports using dynamic LINQ queries
- Revamp proprietary software for smart card authentication on non-domain connected computers
- Develop non-person entity automatic certificate enrollment software over EST protocol
- Technologies: C#, .NET 9, Blazor, Entity Framework, Microsoft SQL Server Management Studio

FUNetix May 2023 - May 2024

Software Developer

- Build interactive features for full-stack, responsive education literacy web application
- Technologies: React, JavaScript, HTML, CSS, Git

Projects

Chess with Friends [GitHub](#) [Website](#)

- Developed online multiplayer chess web app using the MERN full stack framework
- Utilized RESTful API for account and game storage and a bidirectional socket for multiplayer feature
- Designed and implemented login mechanism, real time multiplayer gameplay, and chat functionality
- Technologies: JavaScript, React, Node, HTML, CSS, web sockets, MongoDB, Express

ChatGPT Chrome Extension

- Developed a Chrome web browser extension that scrapes and summarizes Wikipedia articles
- Scraped articles to summarize articles using OpenAI's large language model API
- Technologies: Javascript, OpenAI API, HTML, CSS

Additional Experience

Mentorship

- Tennis coach with over 30 students, ages ranging from 4 to 55, at peak enrollment (Sept 2020 - Present)
- STEM mentor for elementary and middle school students (August 2018 - May 2022)
